Practice Questions

What is Prepfly?

Prepfly is a full-stack PTE Academic preparation platform built for both **individual students** who want to practice at their own pace and **coaching centres** that need to manage batches of students under one roof. The platform combines AI-powered feedback, gamified progress tracking, and comprehensive analytics — without the high monthly fees of traditional prep platforms.

SECTION 2

Student Features

2.1 Practice Engine

 Core Practice**Practice by Section & Type**

Browse every PTE question type organised by skill — Speaking, Writing, Reading, and Listening. See exactly how many questions are available, the time limit per question, and jump straight into practice with one click. Filter by topic, difficulty, or source (platform-wide or centre-specific).

**AI-Powered Scoring for Speaking & Writing** AI

After each speaking response, Preply's AI evaluates your answer against PTE band descriptors and gives you a score out of 90 — the same scale as the real exam. Writing responses receive detailed feedback on content, grammar, structure, and vocabulary. Temperature-tuned at 0.2 with a fixed seed for low variance across repeated attempts.

**Objective Auto-Scoring (Server-Side)**

MCQ, Reorder Paragraphs, Fill in the Blanks, Dictation, and Highlight Incorrect Words are scored server-side in milliseconds. Answer keys are never sent to the browser — preventing cheating while keeping latency low. Tolerant matching for Fill-in-the-Blanks handles punctuation, case, and surrounding spaces.

**Re-Try & Score Comparison**

After any attempt, hit "Try Again" to redo the same question. Preply automatically shows you the delta — whether your new score is higher or lower than your last attempt — with a green "Score improved!" banner and an up/down arrow indicator. A trend chart tracks all your scores over time for every question.

**Question Flagging & Bookmarking**

Flag any question as **Weak**, **Review Again**, or **Strong**. Your flags are saved and accessible from a dedicated "My Flags" page so you can drill down on the exact questions that need attention without hunting through the question bank.

**Question Reporting**

Spot a wrong answer, broken audio, or a typo? Report it in one tap. Reports are routed to admins with full context (question ID, user ID, issue type) so the content team can fix problems quickly.

2.2 Mock Tests

 Full & Sectional Mock Tests**Real Exam Simulation**

Full-length mock tests mirror the actual PTE structure — 28 Speaking, 3 Writing, 11 Reading, and 14 Listening questions — with authentic time limits per section. The interface prevents skipping ahead between sections, just like the real exam.

**Sectional Tests**

Prepare for a specific skill without committing to a 3-hour session. Sectional mock tests let you focus on your weakest area, time-boxed and scored exactly like the full test.

**Detailed Score Report**

After completing a test, a full report breaks down your score by section and question type, shows which questions you answered vs. left pending, and provides the honest "Answered + pending (counted as 0)" calculation — no inflated scores. Compare against your previous mock test attempts at a glance.

**Centre-Assigned Tests**

Your coaching centre can assign specific mock tests to your batch. These appear in a separate "Assigned" tab so you never miss a batch exam. Centre teachers track completion rates and scores across all students.

2.3 Progress & Analytics

**ANALYTICS****Progress Dashboard**

See your practice streak, total questions completed, average scores by section, your strongest question types, and your weakest — all on one screen with historical trend lines.

**GAMIFICATION****Daily Practice Goal**

Set a daily target (e.g. 10 questions per day). A progress bar on the dashboard fills as you practice, and a streak counter rewards consecutive days of practice.

**COUNTDOWN****Exam Date Countdown**

Enter your PTE exam date in settings. Prepfly shows a live "X days left" countdown widget on your dashboard so every session feels purposeful.

**LEADERBOARD****Centre Leaderboard**

Compete with fellow students in your coaching centre. Ranked by average score with a minimum practice threshold to appear — privacy-safe (first name + last initial only).

**REVIEW****Attempt Review**

Click any past attempt to see exactly what you answered, the model answer, and the AI's line-by-line feedback. Great for self-correction and understanding exactly where marks were lost.

**PERCENTILE****"Better than X%" Percentile**

After scoring, see what percentile your score ranks against all other Prepfly users who attempted the same question. Puts your performance in context instantly.

2.4 Study Resources

**RESOURCES****Study Guides**

Detailed guides for all 22 question types covering strategies, time management, and common mistakes. Includes essay templates (3 types), SWT formula, linking words bank, and note-taking guides for listening.

**VOCABULARY****Vocabulary Builder**

PTE-essential word list with meanings, contextual examples, and difficulty ratings. Switch between flashcard and list mode. Track mastered words. Custom words added by your coaching centre appear automatically.

**AI AUDIO****Model Answer TTS** **AI**

After completing a Read Aloud or speaking question, tap "Listen" to hear an AI-generated model answer read at PTE exam speed. Use it for shadowing practice — one of the most effective speaking improvement techniques.

**PREDICTIONS****High-Frequency Predictions**

The dashboard surfaces question types and topics that appear most frequently in the real exam based on your centre's curated prediction bank. Focus your limited prep time on the highest-value content.

2.5 Access & Payments

Subscriptions & Access Control

**Flexible Module Subscriptions**

Buy access to individual skills (Speaking, Writing, Reading, Listening) or get the all-in-one bundle. Choose 1-month, 6-month, or 12-month plans. Prices shown upfront with no hidden fees. Pay via Razorpay (UPI, cards, net banking, wallets).

**Coupon & Discount Codes**

Apply discount codes at checkout for institutional or promotional pricing. Codes can be percentage-based and are validated in real time before payment.

**Centre Seat Access**

Students enrolled in a coaching centre get access granted directly by the centre admin — no individual payment needed. The centre manages seat duration (typically 30 days, renewable). Seat expiry is clearly visible in your profile.

SECTION 3

Coaching Centre Features

Built for How Centres Actually Work

Preply's centre tools handle the full student lifecycle — from onboarding to renewal — and give teachers real-time visibility into every student's progress. No spreadsheets, no manual tracking, no guesswork.

3.1 Student Management

Student Lifecycle Management

Invite Students by Email

Send a personalised email invitation directly from the dashboard. The student receives a link that auto-connects their account to your centre upon registration. No manual coordination needed.

Bulk CSV Import

NEW

Upload a CSV file with student names, emails, and phone numbers to onboard up to 100 students at once. Existing users are linked and granted a seat automatically; new emails receive a registration invitation. A results summary shows how many were imported, invited, skipped (already enrolled), or errored — with per-row error details.

Centre Invite Link

Generate a shareable invite link or QR code. Share in your WhatsApp group or class — students who register via this link are automatically enrolled in your centre. One-click copy from the dashboard.

Seat Renewal (Single & Bulk)

Renew one student's seat in two clicks, or select multiple students and renew them all at once. The system automatically detects students expiring in the next 7 or 30 days and highlights them with a filter chip — so no one falls through the cracks.

Export Student Data (CSV)

Download a complete student export with names, emails, seat status, batch assignments, total attempts, and mock tests completed. Useful for fee tracking, reporting, and backup.

Seat-Usage Gauge

A live "45 / 50 seats used" gauge shows exactly how close you are to your plan limit. Clearly shows cost per seat and plan tier so there are no billing surprises when adding new students.

3.2 Batch & Group Management

Batches & Class Groups

Create & Manage Batches

Organise students into batches (e.g. "Morning Batch," "Weekend Intensive"). Create unlimited batches, assign students, and view batch composition. Delete batches when a term ends without affecting student data.

Batch Progress Dashboard

View collective analytics for a batch: average scores by section, top performers, engagement rate (who has practiced in the last 7 days vs. who hasn't), mock test completion rate, and weak areas across the group. Identify struggling students before they fall behind.

Assign Mock Tests to Batches

Push a specific mock test to an entire batch with one click. All batch members see the assigned test in their "Assigned" tab and completion status is tracked in real time on the batch progress page.

3.3 Content Management

QUESTIONS

Custom Question Bank

Upload your own questions — single or in bulk — for any of the 22 PTE question types. Add audio files, images, model answers, difficulty tags, and mark questions as "prediction" questions. Your questions appear only to your students.

TEMPLATES

Answer Templates Library

Create reusable answer templates (e.g. essay structure templates, SWT templates) in multiple languages (English, Hindi, Punjabi). Mark templates as free or premium and they appear in your students' Study Guides automatically.

**VOCABULARY****Centre Vocabulary List**

Add custom vocabulary words with meanings, examples, and difficulty levels. These words are added to the Vocabulary Builder for all your enrolled students — great for supplementing platform-wide word lists with your own curated content.

**COMMS****Student Announcements**

Broadcast messages to all centre students — exam schedule changes, holiday announcements, motivation, or important dates. Announcements appear prominently on students' dashboards. Full history is maintained and old announcements can be deleted.

3.4 Centre Analytics

 Centre-Wide Insights**Centre Analytics Dashboard**

Top-level metrics at a glance: total enrolled students, active students this month, total practice attempts across all students, mock tests taken, and a "VIP students" count (high-engagement learners). Inactive students are automatically flagged.

**Per-Student Progress**

Drill into any student's individual record: total attempts, mock tests completed, average scores, recent activity feed, and seat status. Identify students who haven't practiced in several days and follow up before they disengage.

3.5 Branding & White-Label

 Centre Branding**Custom Brand Colours**

Set your centre's brand colour — it's applied to the interface your students see, giving your coaching business a consistent identity within the platform.

**Centre Profile & Contact Info**

Add your centre's name, location, contact number, and website. This information is displayed to students and used in invitation emails sent on your behalf.

**Unique Centre Code**

Each centre has a unique, shareable code. Students can enter this code at registration to join your centre directly — no link required. The code is displayed in your settings and can be shared anywhere.

SECTION 4

All 22 PTE Question Types — Fully Supported

Preply covers every question type tested in the official PTE Academic exam across all four skills. Each type has dedicated practice questions, AI or rule-based scoring, model answers, and study guide content.

SPEAKING (7)

- Read Aloud
- Repeat Sentence
- Describe Image
- Retell Lecture
- Answer Short Question
- Respond to a Situation
- Summarize Group Discussion

WRITING (2)

- Summarize Written Text
- Write Essay

READING (5)

- Multiple Choice (Single)
- Multiple Choice (Multiple)
- Reorder Paragraphs
- Fill in the Blanks (Drag & Drop)
- Fill in the Blanks (Dropdown)

LISTENING (8)

- Summarize Spoken Text
- Multiple Choice (Single)
- Multiple Choice (Multiple)
- Fill in the Blanks
- Highlight Correct Summary
- Highlight Incorrect Words
- Select Missing Word
- Write from Dictation

Scoring Methodology

Objective questions (MCQ, Reorder, Fill-in-the-Blanks, Dictation, Highlight Incorrect Words) are scored server-side with tolerant matching — handling case differences, surrounding punctuation, and whitespace — so partially-correct answers are scored fairly, not harshly.

Subjective questions (Speaking, Writing) are evaluated by an AI model calibrated against PTE band descriptors with example responses at each score level. Low temperature (0.2) and a fixed seed ensure consistent scoring — your score reflects your answer quality, not random variation.

SECTION 5

Platform Comparison

How does Preply compare to the major PTE preparation platforms currently available to students and coaching centres in India and Australia?

FEATURE	PREPLY	E2 LANGUAGE	APEUNI	PTE MAGIC	PEARSON APP

About the Platforms Compared

AU**E2 Language**

Australia-based, widely used globally. Strong video lesson library and AI speaking feedback. However, USD-only pricing makes it expensive for Indian students (~₹2,000–4,000/month). No B2B centre tools. Primarily targets individual self-study students.

CN**APEUNI**

China-origin platform, popular for AI scoring accuracy on Speaking. Strong prediction question library. Priced in USD/AUD, interface partially translated, and no coaching centre management layer. Used mainly in Australia-based centres informally.

**PTE Magic**

Online-only platform with a reasonable question bank. Limited AI feedback, mostly rule-based. No centre tools, no student management, and limited progress analytics. Reasonable pricing for individuals but missing advanced features.

**Pearson Practice App**

The official Pearson PTE practice app. Highest content authenticity (official questions) but very limited question count, no AI feedback, no centre management, no community features. Best used as a final-week supplement, not a primary prep tool.

SECTION 6

Why Preply?

FOR CENTRES

The Only Platform Built for Coaching Centres

Every other PTE prep platform is built for individual students who pay for themselves. Preply is the only platform that includes a complete coaching-centre management layer — student onboarding, batch organisation, mock test assignment, per-student analytics, and seat renewals — all in one place. Run your entire PTE teaching operation without a single spreadsheet.

IN

INDIA-FIRST

Priced for India

Competitor platforms charge USD prices — ₹2,000–5,000/month per student. Preply uses Razorpay with INR pricing, UPI, and modular plans so students pay only for the skills they need. Coaching centres get tiered B2B plans that scale with their business.

SECURITY

Anti-Cheat Architecture

Answer keys for all objective questions are processed server-side and never sent to the browser. This is a security feature that no competitor currently offers — making Preply the only platform suitable for invigilated centre exams where answer leakage matters.

DATA

Actionable Analytics

Weak-area detection, daily goal tracking, practice streaks, percentile ranking, per-question score history, and attempt review — all available out of the box. Students always know exactly what to practice next. Centres always know which students need attention.

CUSTOMISATION

Your Brand, Your Content

Upload your own questions, create your own templates and vocabulary lists, brand the platform with your colours, and communicate directly with students via announcements. Preply powers your coaching business — students see your brand, not ours.

AI

Calibrated AI Scoring

Speaking and writing scores are generated by AI models trained with PTE-specific band anchors and example responses. Low-temperature (0.2) inference with a fixed seed gives consistent scores — you get the same result on the same answer every time, unlike black-box systems with high variance.
